Description

The F4U-4 is the last of the legendary Corsairs to serve in WWII. Delivered to the United States Navy in early 1945, the F4U-4 is powered by a Pratt & Whitney R2600-11W supercharged Twin Vee engine, pushing 2100 horsepower. Retaining the six 12.7mm guns and load carrying capabilities of the F4U-1D, the F4U-4 achieved an unbelievable 11:1 kill ratio during its service life.

We are proud to announce a faithful recreation of the F4U-4 in 1100mm wingspan form - complete with a realistic 4-bladed propeller, removable auxiliary fuel tanks, tail-hook, functional flaps, retractable landing gear and LED light kit. Power comes from a 3936-850 KV motor with a 40A ESC, giving swift ample power when needed.

FEATURES

- Ducted-blade and ground power system
- Realistic scale details
- High-strength, airframe
- Easy assembly
- Environmentally friendly, water-based paint

SPECS

- Construction: EPO foam
- Wingspan: 1100mm (43.3in)
- Length: 650mm (25.6in)
- Flying Weight: Around 10lbs
- Electronic Speed Control: 4kVamp
- Propeller: 10.5 x 8
- Servos: 6 x 9gram
- Electric retracts with rotating retractable main gear
- Controls: Ailerons, Elevator, Rudder, Flaps
- Take off from short runways

INCLUDES

- F4U-4 Corsair
 - 3936-850KV outrunner brushless motor (installed)
 - 40A ESC (installed) (XT60 Connector)
 - Electronic retractable landing gear (installed)
 - Servos (installed)
- REQUIRED TO COMPLETE:**
- 2-Channel radio transmitter and receiver

• 3S 2200mAh LiPo battery with XT60 connector

• Suitable LiPo charger
