Description

Old classic with the Carrera design.

The Ford Mustang has been around since 1964, and today it's still one of the world's most iconic sports cars. In 2015, the 10-millionth Ford Mustang rolled off the Michigan production line. Carrera has modified the number-5 Ford Mustang GTY to optimize its driving characteristics on the racing circuit. This version appears in its typical colours of American motor sports – blue and white.

It's back-to-the-roots time.

High-speed lounge crowd races along the Ford Mustang GTY No.5 to show off its power, sophisticated Carrera design work, and brightly shining front and rear lights. The car can be refitted for digital racing with a digital decoder.

Features:

Ford Mustang GTY No.5
