Description

FEATURES

The FS-X8B is a single antenna bidirectional receiver using the AFHDS 2A protocol (second generation automatic frequency hopping digital system).

It is compact, easy to install and can output using a standard PPM on-bus signal.

Compatible transmitter: transmitter, FS-i6, FS-i6s, FS-i6x, FS-i8, FS-i10.

Function: Support PPM-i-Bus bidirectional transmission, the i-Bus signal port, support up to 8 channels.

Range without interference to earth (transmitting and receiving 1m from the ground): >300m.

SPECS

Product Model: FS-X8B

Product Name: Receiver

Channels: 8

Format: i-Bus

Frequency Range: 2.408-2.475GHz

Bandwidth: 200kHz

Number of Bands: 135

Transmitting Power: Smaller than 200mW (EU)

Sensitivity Receiver frequency: 92dBm

2.4GHz protocol: AFHDS 2A

Modulation: GFSK

Transmission method: FHSS

Channel latency: Smaller than 150μs

Antenna length: 33mm (double antenna)

Input power: 4.0-5.1V

Input: LED indicator

Online update: none

Interference-free range 1m from ground: more than 300m

Channel data: 1200baud

Range: 1000-2000m

Size: 32*22*7mm

Weight: 3.7g
