### Description

The HS-311 sport servo provides the novice modeller all the performance and reliability you would expect to find in a more expensive servo. Combined with precise main gears and SMT circuitry, the HS-311 represents a remarkable value in today's R/C market.

#### Features:

Reliable Three-Pole Frame Motor

Durable Reinforced Gear

Performance Space

Operating Voltage Range (Vols DC): 4.8V - 6.0V

Speed (Second @ 60°): 0.19 - 0.19

Maximum Torque Range (oz-in): 120-60

Maximum Torque Range (kg-cm): 3.0 - 3.5

Current Draw at Idle: 7.7 mA

No Load Operating Current Draw: 100 mA

Stall Current Draw: 800 mA

Dead Band Width: 0.5°

Physical Specs:

Dimensions (Inches): 1.57 x 0.78 x 1.45

Dimensions (Metric): 40.0 x 20.0 x 36.8

Weight (Ounces): 1.61

Height (Gears): 43.0

Output Type: Analog

Motor Type: 3 Pole Metal Bush Frame

Case Material: Nylon

Branding Type: None

Output Shaft (Type / diam): Standard 24

Case Material: Plastic

Connector Gauge (AWG) / Strand Count: 25 / 40
