Features

- One of the most durable and easiest to fly trainer models yet for beginner RC (Radio Controlled) airplane pilots.
- A scale replica of one of the most popular and iconic WWII fighter aircraft of all time – the P-51D Mustang.
- 100% complete and ready to fly right out of the box – there's nothing extra to buy so it's an incredible value.
- Equipped with SAFE technology that helps prevent crashes and makes it easy for everyone to learn how to fly.
- Beginner, Intermediate and Experienced flight modes you can easily change between any time at the flip of a switch!
- Includes a 5-channel controller/transmitter with 2.4GHz technology and features 4-channels of control for training to full aerobatic flight capabilities.
- Capable of aerobatic maneuvers including loops, rolls, and even upside down (inverted) flight in the Experienced flight mode.
- Lightweight yet incredibly durable EPP construction perfect for first-time pilots.
- Automatic aerobatic mode activates at the push of a button to perform single or multiple loops or rolls in the Beginner and Intermediate modes.
- Powerful and efficient electric motor for easy operation, excellent performance, and long flight times.
- Includes two rechargeable 1S 400mAh LiPo batteries and a USB charger for convenient recharging.
- Takes off from and lands on smooth surfaces using the included landing gear featuring a built-in wheel in the scale location.
- Remove the landing gear to easily hand-launch over trees and on grass or other suitable surfaces.
- Features a unique "pop-off" prop design to prevent damage plus includes a spare propeller.
- Ultra-compact size to fly in large yards, parks, at sports fields and beyond.
- Replacement/spare parts and batteries are readily available.
