Description

SUPER DECALS FOR 6 VERSIONS - COLOR INSTRUCTIONS SHEET

FIGURE NOT INCLUDED - CONTAINS ONE MODEL

The subsonic two-seater jet trainer Lockheed T-33 Shooting Star played an important role in the operational training of many military pilots during the '50s. It was developed on the airframe of the single-seat fighter F-80, from which it differed by a longer fuselage. The design was simple and practical with the famous "T" shape, characterized by its straight and low wing.

The United States Air Force used the T-33 to perform advanced pilot training tasks until the early 1960s when it was progressively replaced by the most advanced Northrop T-38. Compared to F-80, the T-33 adopted a lighter armament formed by only 2 0.50 (12.7 mm.) machine guns. Its reliability has allowed the T-33 to obtain rapid diffusion in numerous air forces that employed the plane not only for training activities but also in operational missions. The last T-33s in service flew until the 2000s.

Type: Jet trainer aircraft

Origin: From US

Country: United States

Scale: 1/72

Model Dim.: 18,0 cm

Box Dim.: 290 x 190 x 45 mm
