Description

- The snap-down separator gives the John Deere big bale press secure support. The big bale press has cord fire that can be opened. The service flap with press mechanism can also be opened.
- The hay rake is closed in drive mode, where two hay bales can be automatically transported to the discharge chute. The hay bale chute can be filled up in two stages by chains. The John Deere big bale press is suitable for all members of the Profi series (not included).
- AUTOMOTIVE BODY:**
 - 2 bales of hay are automatically transported to the chute in drive mode.
 - Close hay rake.
 - Roller drops down.
 - Load bar can be opened.
- Hay bale chute folds upwards in two stages with chains.
- Service flap/press mechanism can be opened.
