Description

The John Deere 6920 is a powerful and reliable agricultural tool. This model has been a firm member of the BRUDER range for a long time. The engine bonnet can be opened to reveal the engine block.

The off-road front axle can be steered either directly via the movable steering wheel in the cab or via the steering rod extension included, which children can attach to the movable steering wheel through the sliding roof in the cab. The lifting trough of the trailer folds up as part of which the tailgate automatically opens. Recommended linkage to use the grain discharge tool. Traxel tyres round off the product.

All numerous trailers and trailer attachments of the Professional series can be combined with the John Deere 6920 tractor to better illustrate to young farmers how fields are tilled and thus agricultural produce is grown.

Vehicle design:

- Detachable front weight
- Engine bonnet cover can be opened
- Traxel
- Steerable and off-road front axle
- Movement function
- Additional steering rod allows steering through the sliding tractor roof
- Includes tipping trailer with automatic tailgate (item no. 02911)
- Tailgate opens automatically when lifting
- Tipping trough
- Fold-down support leg
- Traxel tyres

General information:

- Recommended age: suitable from 3 years for playing indoors and outdoors

Manufactured from high-quality plastics such as ABS

Scale 1:16 Dims WHL: 170x177x670mm
