Description

KDS820 is a gyro with function of dual rate and head lock, specially designed for helicopters. KDS820 adopts AVCS(Angular Vector Control System) which makes the function of head lock more outstanding and stable.

AVCS system: Since rudder trim changes caused by wind and other meteorological changes, and varieties of helicopter attitude changes are automatically cancelled, the rudder operation becomes easy, making it perfect for 3D flight.

AVCS:

Control system: digital proportional integration system

Series: SMM

Operating current: 50mA

Operating voltage: 4.5V-6.0V

Operation temperature: 0-44°C

Dimensions: 28 x 25 x 20 mm

Weight: 25g
