Description

This model assembly kit recreates the Honda CBR1000RR-R Fireblade SP bike by Honda. Announced in 2019 in Milan, this bike has a decidedly circuit-oriented feel exemplified by a 1,000cc, nine-four engine with the same bore-stroke ratio as the RC213V MotoGP machine. Finely honed cowling designs (the bike's drag coefficient of 0.27 is unrivalled by other production motorcycles), a full suite of electronic rider aids and titanium Akrapovič muffler: truly a crystallization of the top racing technique at Honda, and an exciting new chapter for the famed Fireblade name.

This bike is planned to enter into the World Sale in 2020.

1/12 scale plastic model assembly kit

Length: 170mm, width: 60mm, height: 90mm

Detachable side cover

Features a detailed depiction of the class-leading liquid-cooled 4-cylinder engine
