### Description

This model assembly kit recreates the iconic Porsche 911 GT3 RS (992) introduced in 2022. It is the first new 911 GT3 kit since the release of item 24229 Porsche 911 GT3 in 2001. The Porsche 911 series boasts a long history and continues to evolve. The 911 GT3 RS (992) is a high-performance road car with an emphasis on circuit driving.

It has vents on the bonnet and fenders and is equipped with airflow fins on the front and rear wheel arches and roof. In addition, the large rear wing uses a variable "DRS (Drag Reduction System)" to thoroughly pursue aerodynamics. Of course, weight reduction is also achieved by using carbon fiber reinforced plastics "CFRP" extensively in various parts of the body. The engine mounted in the rear is a 4-liter horizontally opposed 6-cylinder. With the incorporation of numerous racing technologies, it delivers 526 horsepower!

#### About the Model kit

1/24 scale plastic model assembly kit, Length: 193mm, width: 85mm, height: 58mm

Air vents and fins are automatically recreated!

The model can be assembled as the left-hand drive (European Spec.) with recreations of sporty "Weissach package" wheel shape, carbon fiber sections (hood, roof, rear wing and side mirrors), roll cage, door straps, shift paddles and headrests, logs.

Details depict dashboard, carbon fiber components, mesh seat surfaces and door linings, and headrests, logs.

Details depicting side graphics "GT3RS" and Porsche logo come in 4 colors: RED, BLACK, DARK BLUE, and SILVER, which allow modelers a wide range of body color choices just like the real sports car!

Metal transfers recreate rear-view mirror and side mirrors, and rear lights.

Separate components recreate brake calipers and discs, and they are movable!

Comes with solid synthetic rubber tires.

Masking stickers are included for the painting of windows and headlight covers.
