Description

This is a special edition of the Grand Hauler. The R/C model assembly kit recreates a massive boxy, customized truck like those seen in North America. The special edition version is a great option for those without the time or confidence to apply a paint job to their kit, as the body and other key body parts are pre-painted Metallic Black (Tamiya Colour TS-40). Additionally, a matte coating is applied over the metallic black which provides a cool look as seen in current trends in the automotive scene.

The model's ladder frame chassis features aluminum side channels with resin cross members and is equipped with a highly realistic suspension utilizing metal leaf springs and friction dampers. A front-mounted motor and 3-speed transmission power the two rear wheel axles, which are fitted with built-in differentials to enable smooth cornering. A 4-channel R/C system and multi-function unit allow you to drive the vehicle and experience realistic engine sounds and vibrations. (Both sold separately.)

1/14 scale R/C model assembly kit. Length: 892mm, Width: 192mm, height: 330mm.

Body parts are moulded in black, pre-painted in Metallic black (TS-40), and given a matte urethane top coat.

Metal plated parts include bumpers, radiator grille, roof-top horn and light bezel parts, side and curb mirrors, air cleaners, mufflers and more.

3-axle chassis utilizes a tough ladder frame with aluminum side channels and resin cross members. A realistic drivetrain setup uses the front mounted motor powering twin rear axles.

3-speed transmission can be controlled via a separately sold 4ch R/C transmitter. Item 7255252 Attack 2.4GHz Radio System recommended for 100% function compatibility.

Metal leaf spring dampers with built-in coil springs provide durable suspension.

Coupler is included to enable connection with any currently available Tamiya 1/14 scale trailer.

Compatible with separately sold Multi-Function Control Unit (MFC-01 (Item 96511) or MFC-03, Item 96523) for realistic LED lights and sounds.

Requires: 7.2volt battery with charger, ESC, 4-channel radio, and steering servo.
