### Overview

This is a TAMIYA 1/14 scale R/C semi-truck assembly kit model of a timber truck with long rear bed featuring a distinctive frame and stakes for carrying logs. The model itself depicts the Volvo FH16 Globetrotter, a 750hp 16.1-liter turbocharged engine-powered truck from the Swedish company's flagship FH Series that underwent a full model change in 2019.

### Features

1/14 scale R/C tractor truck model assembly kit

Length: 733mm

Width: 184mm

Height: 306mm

ABS plastic body captures the FH16 Globetrotter form, with stainless steel photo-etched front grille, and cab interior details.

Deposition of stakes and cab rear headboard use a durable combination of resin and metal.

Assembly type 3-speed transmission allows gear changes via separately sold 4-channel transmitter.

Ladder frame features aluminum side channels with plastic cross members.

Power from the front-mounted motor is delivered to rear axle via propeller shaft. A built-in differential gear on each axle enables smooth cornering.

Highly elastic suspension utilizes metal leaf springs and friction dampers. The model enjoys easy driving thanks to its front-mounted on-cast front and reinforced rear rear axle.

TR Mighty Tuned motor (BST) provides plenty of power, even when driving with load.

Printable templates for the creation of paper craft logs available for download.

LED cables in Multi-Function Control (MFC) units are not compatible with this model. You will need to purchase separately available longer-cabled LEDs (Items 56549-56551) if using MFC.

Compatible option parts (TROPS) include Items 56524, 56531, 56532, 56539 and 56546.

### Requires

4-Channel radio

One Servo

Electronic Speed Control

7.2V Battery with compatible Charger

Tamiya TS-Paint (For painting Body Shell)
