Description

The popular Multi-Function Control (MFC) unit for R/C tractor trucks, which adds a whole extra layer of realism to driving, receives an update. This unit allows transmitter trim levers to be combined with stick control use, meaning you can enjoy lights, sounds and vibrations coordinated with actions while driving your R/C tractor truck model. This version of the MFC features engine sounds which were recorded from a real European truck's 1.6 diesel engine for amazing realism.

FEATURES

12 different types of sound

Engine ignition and shutdown

Idle

Gear changes

Brakes

10 sound effects and vibrations

A 60mm-diameter full-range speaker in a resin case provides excellent quality

Up to 24 actions can be controlled using a 4-channel transmitter

Light operation and volume adjustment are also possible using the transmitter

Includes white, red and yellow high brightness LEDs to duplicate truck H/D lights with precision

An ESC has been built in to the unit, enabling realistic running at very low speeds

The MFC unit can be run in three modes:

R/C mode with Multi-Function (lights and sounds) off

White mode, with R/C and multi-function on

Green mode, which allows display of lights and sounds only

Can be used for support leg operation when employing Item 55505 Motorized Support Legs

Cannot be used together with Item 53909 TLU-01 or Item 53937 TLU-02 LED light units.

Requires separately sold 4ch transmitter with slide trims, 4ch receiver and 2 servos (3 if using Item 56505).
