Description

- 4-channel design**
- Low-voltage alarm**
- Motor capacity conversion**
- Flowing mid-point adjustment**
- Easy to fly:** The aerodynamic and spider-like design can provide strong power and ensure the stability of the body. Together with the one-key take-off and landing function, the product is easier to control and more suitable for beginners.
- Altitude Hold:** With the air pressure height adjustment function, the flight is very stable. The aircraft can detect the surrounding environment and ensure stable flight during outdoor flight.
- Strong Power:** The application of BS20 coreless motor and 3.7V 400mAh 20C battery can provide strong power for the aircraft.
- Easy to Replace:** The rear motor is connected with a detachable plug, which makes it more convenient for you to replace it.
