Description

Artesania Latina presents the most accurate replica on the market of the Fokker Dr.I, the infamous Red Baron's biplane. Designed using the latest 3D technology and the knowledge of our model-makers team, this model is made of wood and metal, just like the real one. This kit includes a revolutionary step-by-step multimedial guide with video tutorials and hundreds of colour pictures; building a museum quality kit has never been easier!

Dimensions:

Wingspan: 450mm

Length: 360mm

Height: 160mm

Fokker Dr.I was a German fighter plane from the First World War. It was made known at the end of 1917, especially by the legendary German pilot Manfred von Richthofen, the Red Baron.

It is an airplane that conquered numerous victories for the German side. In that same year, most of the major aviation factories attempted to create their own triple-deck fighters. It was a Dutchman, Anthony Fokker, who finally created the biplane that would become the nightmare of the Allies. Its highest rival in the heights was the British biplane built called Sopwith Camel, war machine of the Allies that allowed to face the great effectiveness and precision of the Fokker I.

The new modelling kit of the German biplane Fokker Dr.I of the Red Baron will delight modelers. It is a wooden model of the German plane with a scale 1/16, very compact and has numerous details. Faithful replica of the original even with the same materials: metal, for the structure, and wood, for the wings.

Suitable for exhibition at any dependency even having a large scale for its compact measures. In addition, the Fokker scale model has the best and most detailed multimedia instructions on the market with 7 languages 770n DVD, video tutorials and more than 600 photos that teach you precisely all the steps to build this fantastic model, that is, up to get a museum quality model.

It has unique high quality details, and it includes a fantastic BONUS that will make you fall in love with this magnificent piece: beautiful methacrylate stand with the name of the plane, brass and steel engraving, injected metal parts, cockpit details, metal structure and wings made of wood, without forgetting the poster of the plane to scale 1: 1. The model is easy to build and has more than 750 pieces.

You can also buy a great tool: Brass photogravure template for airbrush modelling. It creates a fantastic wooden effect. As modeller you will get an unbeatable result by painting the grain of the wood. For all types of models: naval, aerial... Buy your Micro Template for Wooden Simulation!
