Description

HISTORY OF THE FRENCH CUTTER: PEN DUICK

Discover the Pen Duick and its current wooden model kit. It is a wooden model of the legendary Eric Tabarly racing cutter. Saved from history by Eric and his father when the former was only 7 years old, the Pen Duick was the first of a series of boats with which Tabarly won many important ocean races.

Born in Nantes in 1931, Tabarly developed from childhood a passion for the sea and sailing. He got great victories and sprayed records in a time when Anglo-Saxons dominated ocean races. Far from retiring at the time, he continued to build ever more efficient ships and winning races. He met his end by disappearing on his last voyage as the English Channel when steering his old Pen Duick to participate on a regatta of classic sailing in Scotland.

CONTENTS OF THE PEN DUICK MODELING KIT

Build your 1/228 scale model of the Pen Duick mythical French cutter. Its system of construction using laser-cut and frames will help you to build your model in the same way than the construction of the real ship.

This model includes high precision laser-cut board parts, handwood, brass, die-cast and fabric. For the assembly you will be able to follow our complete full colour guide, step-by-step in four languages, accompanied by the full scale drawings of the completed model.

Dimensions

Length : 543mm

Height : 756mm

Beam : 93mm

Scale : 1/228
